

SUMMARY

I am a senior full-stack developer with more than 6 years of experience in web and dApp development. My full-stack experience in JavaScript/TypeScript, React/Vue/Angular, Node/Express, Python/Django, Ruby on Rails, Web3.js/Ether.js and AWS would be an additional plus to your team who is working for a decentralized solution.

ABOUT ME

I always follow KISS approach and DRY principle.
I always respect my clients and looking forward to build a good relationship with clients.
"That's not my job" is not in my language

Quality is important than quantity.
Nothing ventured, nothing gained.
When one door closes, another opens.

EXPERIENCE

Senior DApp Developer

Larva Labs

July 2021 - Dec 2021

Achievements

Contributed to build Meebits markedplace.

- Built NFT marketplace
- Created many boiler plate components in Meebits site
- Integrated FE and Backend using React & Django
- Implemented to connect Metamask, and other wallets to increase user experience
- Unit test

Technologies used:

Ether.js

JavaScript

React

Python Django REST framework

Backend & Cloud Engineer

ATOMIC HUB

Feb 2021 - Apr 2021

Achievements

Built Backend with Ruby on Rails and contributed to deploy to MS Azure

- Created API endpoints for integrating with FE.
- Tested 10+ API endpoints with Postman.
- Designed data structure with PostgreSQL
- Deployed FE and BE to Microsoft Azure.

Technologies used:

Moralis web3.js API

Ruby on Rails

Postman

PostgreSQL

Microsoft Azure

Senior React Developer

GainX

Oct 2019 - June 2020

Achievements:

Developed with React and implemented unit test for each component.

- Migrated class based components to React Hook & functional components.
- Implemented unit test for each component.
- Designed Redux architecture and built saga modules for creating API requests.
- Built customized date picker component using MaterialUI.
- Implemented form validation using react-hook-forms

Technologies used:

React

Redux

TypeScript

MaterialUI

Full-Stack Developer

Legal TechnologyHub

May 2018 - Jul 2019

Achievements

Developed Front-End with React.

- Implemented rich user experiences by creating 15 new features utilizing HTML/JS/CSS/SCSS.
- Utilized and implemented 5+ attractive, responsive, and mobile-friendly website contexts and elements.

Developed Back-End with Express.

- Created 10+ middlewares and mixins
- Created 25+ API endpoints and tested them with postman

Technologies used:

React

Redux

TypeScript

Node.js

Express

HTML/SCSS

MongoDB

Full-Stack Developer

Jubel

Aug 2017 - Apr 2018

Achievements:

Developed Front-End with Vue.js and created custom components and implement Vuex for managing state.

- Built Editable Form Selector using MaterialUI
- Integrated Vue and Vuex.
- Implemented Unit Test

Developed Back-End with Django and created 20+ API endpoints

- Introduced Numpy and Pandas for data processing

Technologies used:

Vue

Vuex

MaterialUI

SASS

Django

Numpy

PostgreSQL

SKILLS & TOOLS

dApp

Ether.js

Web3.js

Frontend

React

Vue

Angular

JavaScript

HTML/CSS/SASS

BootStrap

MaterialUI

TypeScript

Backend

Node Express

Python Django

Ruby on Rails

PHP Laravel/CI

Database

MongoDB

MySQL
