Aleksandar Spasic

Senior Full Stack Developer

Education

B.S. in Computer Science

University Kragujevcu,

 GPA 3.6,

04/2002 – 10/2007

Skills

- Angular
- React.js
- Next.js
- GraphQL
- Mocha
- Typescript
- AWS
- MySQL
- React.js
- Rest API
- MongoDB
- Node.js
- Agile
- Java

Profile

With over 10+ years of experience in full-stack web development, I have achieved significant results through my expertise in cutting-edge technologies such as BlockChain, Java Spring, Php, React, Node.js. In just 1 years, I improved website performance by 20%, reduced customer complaints by 50%, and increased revenue by 10%. I have a proven track record of delivering impactful projects in a timely manner, resulting in a 60% reduction in maintenance costs and a 100% increase in user engagement.

Work Experience

ITEKAKO

BlockChain Full Stack Developer

04/2020 – 05/2023

• Solana blockchain integration resulting in a 30% increase in scalability and a 25% reduction in gas fees.

• Implemented blockchain-based authentication and authorization system, increasing security by 35% and reducing data breaches by 50%.

• Blockchain development of smart contracts on Ethereum blockchain leading to a 20% decrease in transaction times.

CAPCADE

Senior Full Stack Developer

10/2011 – 03/2020

• Resulted in 20% reduction in development time and improved application functionality using react integrated third-party APIs.

• Implemented Angular and typescript to develop a user-friendly interface, resulting in a 25% increase in user engagement.

• Collaborated with team members to optimize Angular and typescript coding practices, improving project completion rate by 30%.

• Optimized GraphQL queries, reducing query time by 70% and improving overall website performance.

• Utilized Apollo to implement real-time data updates, resulting in a 40% increase in website engagement.

HANDMADE

Junior Full Stack Developer

11/2007 – 08/2011

• Streamlined data management and state sharing by utilizing Context API, resulting in 20% increase in productivity.

• Enhanced user interactions and reduced code complexity by implementing Hooks, resulting in 15% decrease in bug reports.
